Profile Summary

B.Tech IT student with a strong foundation in data analysis and data structures, and hands-on experience building and deploying full-stack applications using React, Django, and MySQL. Experienced in developing data-driven systems and chat-bot applications with a focus on efficient data handling, clear logic, and maintainable code.

Interested in the data domain, including working with structured datasets, extracting insights, and supporting decision-making through reliable data pipelines. Currently developing skills in DevOps practices such as deployment, system configuration, and workflow management to ensure stable and consistent application performance. Able to work independently and collaboratively, with experience contributing to project planning and execution.

Education

AISSMS Institute of Information Technology

2023 – Present

Bachelor of Technology in Information Technology; CGPA: 8.6/10

Pune, India

Experience

Armtech AI Pvt. Ltd.

June 2025 – August 2025

Software Developer Intern

- First recruited Intern, part of end-to-end mobile application development from scratch with the MERN stack.
- Created and implemented scalable full-stack features coupled with cloud infrastructure (AWS/EC2, S3) to maintain performance and reliability.
- Assisted in UI/UX development with React Native (Expo), enhancing app responsiveness and reducing load time by 32%.
- Acquired practical experience in cloud deployment and version control (Git/GitHub) in an agile development environment.

EduSkills Foundation – Google AI/ML Virtual Internship

January 2026 – March 2026

AI/ML Virtual Intern

- Completed hands-on training in Artificial Intelligence and Machine Learning concepts through the Google-supported virtual internship program.
- Gained practical exposure to supervised and unsupervised learning techniques, including classification and regression models.
- Developed foundational knowledge of machine learning workflows, data analysis, and model optimization in a collaborative learning environment.

Projects

Scalable Container Health Monitoring and Alerting System

- Developed a CI/CD scalable monitoring system using Prometheus to track Docker container health in real-time.
- Improved system reliability and performance by 40% through the integration of Kafka and the ELK Stack.
- Automated container orchestration and deployment workflows using Docker Compose and Jenkins, reducing manual deployment efforts by 60%.
- Implemented alerting and visualization dashboards in Grafana with Prometheus metrics, enabling proactive issue detection and reducing incident response time by 35%.

Resume Parsing System using Natural Language Processing

- Built an end-to-end AI resume parsing platform with FastAPI backend and Streamlit UI to extract structured candidate data from PDF/DOCX resumes.
- Implemented NLP pipeline implementing spaCy, NER, regex, rule-based parsing, and TF-IDF skill matching for names, contacts, education, experience, skills.
- Integrating MongoDB Atlas storage with indexed search and REST endpoints for fast retrieval and filtering.

Technical Skills

Programming & Databases: Python, Java, C++, MySQL, Power BI, Web/App Development

AI & Machine Learning: Machine Learning, Data Analysis, Predictive Analytics, NLP

DevOps Tools: Git, Docker, Kubernetes, Jenkins, GitHub Actions, Selenium, A/B Testing

Cloud: AWS, Microsoft Azure

Certifications

Coursera: Machine Learning Specialization, Data Analysis Specialization

Microsoft: AZ-900 - Microsoft Azure Fundamentals

AWS Academy: AWS Cloud Foundations
